

## Plan for Dissemination 1

More specifically, for each work-package we will write a report summarizing the main findings. The key findings from the comparative reports will be transformed into articles for submission to scholarly journals for publication. Furthermore, the final report will be transformed from its report form into a marketable book with a leading academic publisher. The high academic standing, reputations and publication record of the consortium underwrites the achievable impact of the study within the academic community, both at the national and international levels. In addition to scholarly publications, high-level scientific workshops will be organized at national and international professional associations.
